Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Spiegelman et al or Alvarez, Jr. Spiegelman et al and Alvarez, Jr. both disclose methods for purifying ammonia by contacting the ammonia with manganese oxide which may also include another oxide such as vanadium oxide. (See col. 4, lines 12-53 of Alvarez, Jr., and Paragraph [0023] of Spiegelman et al. The difference between the processes disclosed by Alvarez, Jr. and Spiegelman et al, and that recited in applicants' claims, is that Alvarez, Jr. and Spiegelman et al do not specifically disclose that the metal oxide to be employed in addition to the manganese oxide should be vanadium oxide. It would be prima facie obvious to employ vanadium oxide as the metal oxide in addition to the manganese oxide as the getter in the process of either Alvarez, Jr. or Spiegelman et al, since Alvarez, Jr. and Spiegelman et al both disclose in the aforementioned passages that vanadium oxide may be one from a list of metal oxides which can be used in combination with the manganese oxide. It is noted that Spiegelman et al has a filing date of July 23, 2003, which is after applicants' foreign priority date of October 24, 2002. However there is no certified English translation of applicants' foreign priority document of record, so it cannot be determined if applicants are entitled to such priority date.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1754

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "selected from..." is improper Markush terminology.
